Summary

Backend-focused software engineer with 3 years of experience building scalable REST APIs and data pipelines. Skilled in Python, Django, and cloud deployment, with a strong interest in machine learning applications for production systems.

Skills

Languages: Python, JavaScript, SQL | Frameworks: Django, Flask, React | Cloud & DevOps: AWS, Docker, Kubernetes | Databases: PostgreSQL, MongoDB, Redis | Tools: Git, Jenkins, Postman

Experience

Backend Engineer — Nimbus Cloud Systems, Bengaluru (Jul 2022 – Present)

- Designed and built REST APIs in Django for a multi-tenant SaaS billing platform serving 50,000+ users.
- Migrated legacy MySQL workloads to PostgreSQL, improving query performance by 35%.
- Containerized core services with Docker and deployed to AWS ECS, reducing deployment time from 40 minutes to 8 minutes.
- Set up CI/CD pipelines using Jenkins and GitHub Actions to automate testing and deployment.

Software Engineer Intern — Pixel Forge Labs, Pune (Jan 2022 – Jun 2022)

- Built internal tooling in Python and Flask to automate QA reporting, cutting manual review time by 60%.
- Wrote unit and integration tests with PyTest, increasing test coverage from 40% to 78%.

Projects

Real-Time Chat Application — Personal Project

- Built a real-time chat app using Node.js, Socket.io, and React; deployed on AWS EC2 with Redis for session management.

ML-Based Expense Categorizer — Personal Project

- Trained a scikit-learn classifier to auto-categorize bank transactions; achieved 89% accuracy on a labeled dataset of 5,000 transactions.

Education

B.Tech in Computer Science — Vishwakarma Institute of Technology, Pune (2018 – 2022)

Certifications

AWS Certified Solutions Architect – Associate (2023)
